Sometimes it is more appropriate to create content rather than translate it. We have extensive experience in writing content-rich, industry-specific and highly relevant content in different languages for companies around the globe.

■ Video Content

Multilingual video content helps get your ideas and messages across clearly in different markets. We help clients create the right videos according to their specific needs – videos that are really going to have an impact!

■ Audio Content

Audio content (podcasts, audio clips) is a very cost-effective way to distribute your message to a large audience. Examples could include an interview with a key member of your staff (which can then be shared worldwide), or an audio instruction manual for employees to follow.
